

HOTELS, RESORTS AND HOSPITALITY COMPANIES

Diversegy is an energy advisory offering solutions tailored to your industry and business needs.

Hotels, resorts and hospitality service providers need to keep the lights on, AC and heat running and the kitchens open and operational. You spend a lot on electricity and natural gas and those costs add up over the year. Diversegy can help reduce that energy overhead, so you can increase profitability. Free up resources to invest in capital improvements, guest attractions or amenities. Plus, because we shop the best suppliers and negotiate on your behalf, so you don't have to!

Case Study

A hotel in Pennsylvania entrusted its bottom line to Diversegy. Our experts reviewed their energy bills and completed a full review of all annual costs related to energy expenses. The custom pricing analysis unearthed that our client was procuring their electricity directly from the local utility at a high variable rate, that fluctuated throughout the year. Our proposal presented a number of fixed rate options from our portfolio of suppliers, and our client realized a \$0.019/kWh rate reduction as a result. This saved them over \$25,000 and freed up capital to offset the cost of much-needed renovations in their facility.
